

## 5in1 SAFETY COUPLER

### Your All-in-One Solution for Air Tool Connections

#### Simplify Air Connections

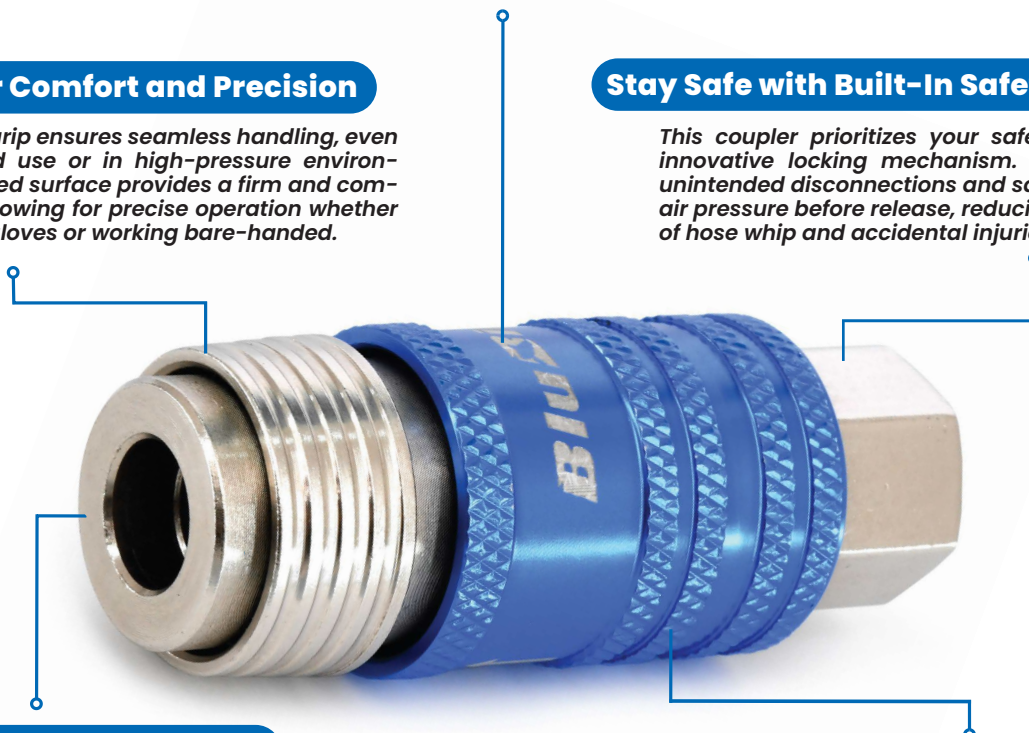

Say goodbye to the inconvenience of mismatched connectors. The **BluBird 5-in-1 Coupler** integrates with five major plug types, making it an essential tool for diverse pneumatic setups. Its safety features and quick-switch design make connections fast, secure, and versatile across any setup, allowing for smooth transitions in various work environments.

#### Designed for Comfort and Precision

The ergonomic grip ensures seamless handling, even during extended use or in high-pressure environments. Its textured surface provides a firm and comfortable hold, allowing for precise operation whether you're wearing gloves or working bare-handed.

#### Stay Safe with Built-In Safety Features

This coupler prioritizes your safety with its innovative locking mechanism. It prevents unintended disconnections and safely bleeds air pressure before release, reducing the risks of hose whip and accidental injuries.

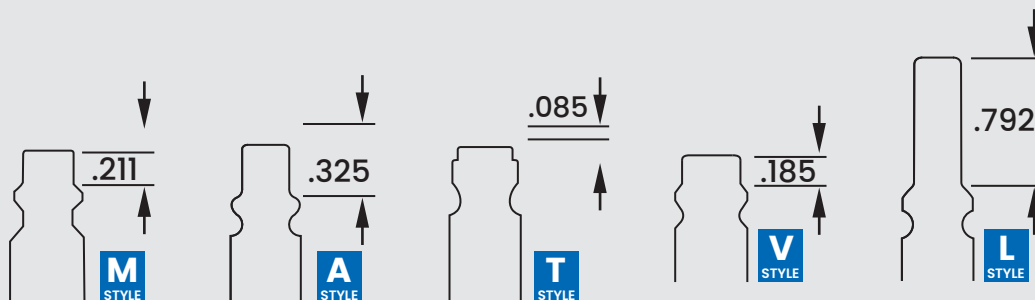

#### Fast and Secure Connections

The quick-connect mechanism allows effortless switching between tools, saving you time while maintaining a secure and leak-free connection. Its high-quality air seal ensures consistent pressure and operational efficiency.

#### 5 Major Interchanges

The BluBird 5-in-1 Safety Coupler fits 5 major plug types—M Style, V Style, T Style, A Style, and L Style. Its compatibility, combined with safety features and a quick-switch design, makes it the perfect choice for versatile and efficient pneumatic setups.

## 5-in-1 SAFETY COUPLER

The 5-in-1 Coupler w/ 1/4" Female Thread is a versatile and essential component for any professional or DIY enthusiast working with fluid or gas systems. Featuring five different connection options in one compact unit, this coupler offers unmatched flexibility and convenience. With a 1/4" female thread, it is designed to securely connect to a wide range of hoses, pipes, and fittings, making it an ideal choice for applications in automotive, industrial, and agricultural settings.

Crafted from high-quality materials, the 5-in-1 Coupler ensures durability and resistance to wear and corrosion. Its easy-to-use design allows for quick and reliable connections, reducing downtime and increasing efficiency. Whether you're working with air, water, or other fluids, this coupler provides a reliable solution for all your connection needs.

### ACCEPT 5 CONNECTING FITTINGS

### Features :

- Universal air tool coupler for M, V, T, A, L plug types
- Heavy-duty pneumatic coupler for industrial and automotive use
- Quick-connect air hose coupler with built-in safety feature
- Durable and lightweight air compressor coupler for DIYers
- Corrosion-resistant multi-plug air coupler for all setups
- Made of premium steel for durability and reliability
- 1/4-Inch Female Thread
- Lightweight and Compact

#### Built-In Safety Mechanism

- Prevents accidental disconnection and safely bleeds air pressure.

#### Ergonomic Grip

- Textured design ensures comfortable and secure handling.

#### Enhanced Air Seal

- Maintains consistent pressure by preventing leaks.

#### Compatibility With 5 Major Interchanges

- Works with M, V, T, A, and L plug types for unmatched versatility.

#### Quick-Connect Mechanism

- Enables fast, secure tool changes without leaks.

#### Corrosion-Resistant Finish

- Protects against rust and wear for long-lasting performance.
