3 Way Coupler

The Blubird Lead In Hose with 3-Way Coupler is a high-quality, durable hose designed to provide a reliable connection for your pressure washer setup. This lead-in hose features a 3-way coupler, allowing you to connect multiple hoses or accessories to your pressure washer system with ease. Whether you're working on residential or commercial projects, this hose ensures a secure, leak-free connection, providing consistent water flow for optimal performance.

Made from premium materials, the Blubird Lead In Hose is built to withstand high-pressure applications and harsh outdoor conditions. The flexible design ensures easy maneuverability and storage, while the 3-way coupler offers versatile functionality, making it ideal for various cleaning tasks. This hose is compatible with a wide range of pressure washers and accessories, providing a convenient solution for connecting and extending your pressure washing system.

**6 Months
Warranty**

Applications:

- Durable and high-pressure resistant
- Leak-free connections
- Easy to Use & Store versatile compatibility
- Long-lasting performance
- Power industry
- Chemical plants
- Construction site
- Iron and Steel plants

Easy Installation

Our 3-Way Coupler offers multiple uses of one air inlet. Just connect the brass plug and silver hub to the air source and connect the rest of the couplers to the distributing outlets. It simply turns a single inlet from an air compressor into 3 separate outlets, supplying air to multiple air tools and improving work efficiency.

Extremely Adaptable

It is extremely ideal for a wide range of applications, from industrial to workshop tasks. This industrial interchange is compatible with "M", "D" and "I/M" style plugs and couplers.

Quick-Connect Design

Push-on style couplers, allows you to push hard to quickly connect the coupler to your tool, easy connect and disconnect, convenient and fast

Easy to Use

Simply connect to the air flow, disconnect the corresponding port and automatically cut-off the air flow, forming a system that supplies multiple lines from a single source.

300 PSI working pressure
