

J-ROD

BluShield J-Rod Pressure Washer Nozzle Kit Effortless Cleaning. Maximum Efficiency.

The BluShield J-Rod pressure washer nozzle kit is designed to optimize your cleaning process with quick nozzle changes, ensuring efficiency and precision for both professionals and DIY users. Engineered for 2-4 GPM pressure washers and built to withstand up to 4000 PSI, this kit is an essential tool for soft washing, detergent application, and high-pressure cleaning.

Performance & Benefits

- **Efficient Cleaning** : Instantly adapt to different cleaning needs without stopping to change nozzles.
- **Versatile Spray Options** : Handles everything from delicate surfaces to tough grime removal.
- **Soft Wash & Chemical Application** : Works seamlessly with downstream injectors for even detergent distribution.
- **Enhanced Equipment Longevity** : Reduces high PSI usage for soft washing, protecting surfaces and extending washer life.

- **Universal Compatibility** – Standard 1/4-inch quick-connect fittings allow easy attachment to most pressure washers.
- **4 Precision Nozzles** – Includes multiple spray patterns for soap application, rinsing, fan spray, and pinpoint accuracy.
- **Time-Saving Design** – Quickly switch between nozzles without manual changes.
- **High-Performance Cleaning** – Ensures consistent chemical application and effective rinsing.
- **Durable Construction** – Heat-treated, corrosion-resistant stainless steel for long-lasting use.
